

MINIMUM ADVERTISED PRICING (MAP) & INTELLECTUAL PROPERTY (IP) Policy

ecoNugenics Inc. sincerely appreciates the confidence shown in our products and the interest in making these products available to end consumers. Due to the extensive investment we have made in researching, developing, manufacturing and building a unique market image for our products, we are anxious to protect our brand through a formal Minimum Advertised Price (MAP) and Intellectual Property (IP) Policy. By purchasing ecoNugenics' products for resale, all parties agree to adhere to our MAP and IP Policy as follows:

- While actual sales price is to be set at the discretion of the individual reseller, this MAP policy deals specifically with the publicly advertised pricing
- The term "advertised" includes – but is not limited to – public audio, video, online or printed materials
- **ecoNugenics products** (including our brand likeness or trademarks) may not be advertised for any prices less than the MAP price as shown on the attached price sheet (equivalent to 85% of the current Suggested Retail Price – SRP)
- Prices may not be concealed below MAP in internet shopping carts by using click-through practices, such as "too low to show" or "add to cart to view price", and/or any other method(s) to conceal prices

Rights and Restrictions: ecoNugenics specifically authorizes legitimate resellers to use our registered trademarks solely for the promotion or sale of ecoNugenics' products. ecoNugenics retains all rights, title and interest in and to our trademarks and other intellectual property. Significant goodwill and brand value are associated with ecoNugenics' trademarks and we therefore require resellers of our products to operate their businesses consistent with the highest integrity and good business standards. No warranties, claims or representations about ecoNugenics' products are to be made that are inconsistent with ecoNugenics' current labels and/or printed literature.

Amazon Channel: Econugenics Inc. has made the decision as a company to work with an exclusive Amazon FBA reseller to help us protect and grow our brand on Amazon and offer the best overall experience to customers. Effective June 1, 2018, Amazon resellers are not authorized through us or our distributors. All non-authorized Amazon listings after July 1, 2018 will receive a trademark infringement notice from the Amazon Brand Registry.

Violation of ecoNugenics MAP or IP rights: ecoNugenics Inc. reserves the right to discontinue sales to any party that violates our MAP policy or misuses any of our intellectual property (trademarks, patent numbers, trade dress, etc.) Pricing adjustments to meet the terms of the MAP policy should be made within 48 hours in the case of online advertising or within 30 days for any printed pricing. IP violations must be corrected within 10 days of notification from ecoNugenics.

It is agreed that _____ as a customer of ecoNugenics or as a customer of any of our authorized distributors/wholesalers, will comply with the MAP policy and Intellectual Property policy as explained above.
